Journal of Hydrology

Contents

Publisher's Note vii

Preface 1

Moisture distributions and wetting rates of soils at experimental fields in the Netherlands, France, Sweden and Germany
L. W. Dekker, C. J. Ritsema, O. Wendroth, N. Jarvis, K. Oostindie, W. Pohl, M. Larsson and J.-P. Gaudet 4

Field study on the local variability of soil water content and solute concentration
A. M. Netto, R. A. Pieritz and J. P. Gaudet 23

Spatio-temporal patterns and covariance structures of soil water status in two Northeast-German field sites
O. Wendroth, W. Pohl, S. Koszinski, H. Rogasik, C. J. Ritsema and D. R. Nielsen 38

A mathematical model for estimating the extent of solute- and water-flux heterogeneity in multiple sample percolation experiments
F. Stagnitti, L. Li, G. Allinson, I. Phillips, D. Lockington, A. Zeiliguer, M. Allinson, J. Lloyd-Smith and M. Xie 59

Preferential flow and solute transport in a large lysimeter, under controlled boundary conditions
R. Schoen, J. P. Gaudet and T. Bariac 70

Modelling of solute transport in a large undisturbed lysimeter, during steady-state water flux
R. Schoen, J. P. Gaudet and D. E. Elrick 82

Simulation of bromide tracer and nitrogen transport in a cracked clay soil with the FLOCR/ANIMO model combination
R. F. A. Hendriks, K. Oostindie and P. Hamminga 94

Quantifying the impact of preferential flow on solute transport to tile drains in a sandy field soil
M. H. Larsson, N. J. Jarvis, G. Torstensson and R. Kasteel 116

Describing water flow in macroporous field soils using the modified macro model
R. Ludwig, H. H. Gerke and O. Wendroth 135

Evaluation of a dual-porosity model to predict field-scale solute transport in a macroporous soil
M. H. Larsson and N. J. Jarvis 153

Simulation of water flow and bromide transport in a water repellent sandy soil using a one-dimensional convection-dispersion model
H. van den Bosch, C. J. Ritsema, J. J. T. I. Boesten, L. W. Dekker and W. Hamminga 172

Modeling solute transport in a water repellent soil
H. V. Nguyen, J. L. Nieber, P. Oduro, C. J. Ritsema, L. W. Dekker and T. S. Steenhuis 188

Modeling gravity driven unstable flow in a water repellent soil
H. V. Nguyen, J. L. Nieber, C. J. Ritsema, L. W. Dekker and T. S. Steenhuis 202
